Bojan Božić is Assistant Lecturer in Computer Science at TU Dublin and has worked on Semantic Web, Machine Learning, and Data Science technologies since 2010. He graduated from the University of Vienna with a PhD in Computer Science. After working in various industry and academic roles, he joined CeADAR and the Dublin Institute of Technology to commence research in Data Science and approach innovation and collaboration opportunities in new projects and is now lecturing, performing leading research and collaborating on several academic and industrial research projects. His current research interests are Semantic Web, Machine Learning, and Natural Language Processing.

Herbert Chimhundu is Research Professor in the Centre for Language and Communication Studies at Chinhoyi University of Technology in Zimbabwe. He holds a doctorate in sociolinguistics from the University of Zimbabwe (1983). He has taught and served in various positions at four state universities in Zimbabwe since 1981. Most of his research and publications have been on the Shona language and outputs from computer-aided lexicography. His current research interests are in language technology applications with particular reference to lexicography, terminology and the strengthening of African languages as vehicles of intangible cultural heritage.

Thabo Ditsele is Senior Lecturer in the Department of Applied Languages at Tshwane University of Technology, where he teaches courses in sociolinguistics and also earned his Ph.D. in Language Practice. He is pursuing a secondary Ph.D. in Linguistics at the University of Cape Town. His research interests include language contact (e.g. Sepitori and Tsotsitaal), language and identity, language attitudes, and multilingualism.

Kudakwashe Dube is Lecturer in Computer Science and Information Technology in the School of fundamental Sciences at Massey University. He completed his Doctor of Philosophy in Computer Science with the Dublin Institute of Technology in 2004. Kuda's current research interests are in knowledge modeling, representation and incorporation in computational models, computer security and information privacy. His research work is multi-disciplinary involving both theory and practice in Computer Science and Health Informatics. This work is conducted within the HIKER Group.

Limukani T. Dube is Assistant Lecturer in the Department of African Languages and Culture at Midlands State University in Zimbabwe. Her research interests include both the development of indigenous languages and language policy and planning. She has previously published on local knowledge and naming practices of the BaKalanga.

Farayi Kambarami is an M.Phil. student in the Centre for Language and Communication Studies at Chinhoyi University of Technology. Since completing his undergraduate studies in business and computer science in 1997, he has worked in various supply chain roles within the consumer goods industry. His current research interests are in the application of natural language processing technologies to African languages in data-sparse situations.

Scott McLachlan is a Research and Teaching Fellow at Queen Mary University and a Fellow in Law attached to the University of Birmingham Law School. He completed a Ph.D. in Computer Science in Health Informatics with the Risk and Information Management (RIM) group at Queen Mary, and also holds a GDL from the University of Waikato, a Masters in Law from the Australian National University, and M.Phil in Science and GradDip in Information Science from Massey University. His research interests lay at the intersections of Information Science, Artificial Intelligence, Medicine and Law with particular focus on issues of privacy and security, consent, health service improvement, information visualisation and explainable causal AI.

Thato Charlotte Phega is Head of the English Department at Lincoln College International in Saudi Arabia, where she leads an international team of academic and support staff. In addition to a Master's in Language Practice obtained from Tshwane University of Technology, as well as TESOL certification from the University of the Witwatersrand, she is also a certified Cambridge Examiner, and literacy program facilitator. Among others, her research interests include vocational education, language attitudes and acquisition, and learning styles.

Kgomotso Jennifer Tshotetsi is a part-time lecturer in the Department of Applied Languages at Tshwane University of Technology, where she teaches communications for academic purposes and also earned her Master's in Language Practice. Her research interests include language contact, particularly how non-standard varieties influence standard ones.

Troy E. Spier is Lecturer of English at Middle Georgia State University in Cochran, Georgia, USA, and Invited Professor of Linguistics at Universidad San Francisco de Quito in Ecuador. He is interested primarily in language documentation and description with a focus on Bantu languages, linguistic landscapes, and (critical) discourse analytic approaches to situated language usage.

Linda van Huyssteen is a retired Associate Professor in the Department of Applied Languages at Tshwane University of Technology and now works as a temporary staff member in the Department, where she teaches terminological development, and analytical reading and writing. Before retirement, she taught language acquisition courses in isiZulu. She earned her Ph.D. in Linguistics from the University of South Africa. Her research interests mainly include African linguistics, terminology development, and onomastics.
